ERROR

Intervention

- **Hospitalization (amount of beds)**
- **Close of borders**
- **Population dynamics**

ERROR

Problem

Analyze the virus propagation by close of borders
restrictions

ERROR

Goals

- See if the closing of borders impacts the number of sick people.
- Consider the change of the population when the borders closed and when they were open.

ERROR

Assumptions

- **Restriction to 1% of San José city**
- **Percentage of people hospitalized in UCI: 14%**
- **Maximum amount of UCI hospital beds: 360**

ERROR
